EDUCATION

Budapest University of Technology and Economics
B.Sc. Student in Computer Science Engineering

Sep 2023 – Jan 2027
Budapest, Hungary

TECHNICAL SKILLS

Programming: C, C++, Java, Python, SQL | Web: HTML, CSS | Tools: Git, GitHub, Webflow

PROJECTS

Todo List Web Application

University Coursework Project | Web and Mobile-based Software | HTML, JavaScript, Bootstrap

- Developed a responsive todo list web application using HTML, JavaScript, and Bootstrap. Implemented user registration and login, task creation and deletion, status-based filtering, item reordering, and localStorage-based persistence, with separate todo lists maintained for each user.

Bloch Sphere Simulator

Group Coursework Project | Quantum Computing | Python

- Worked in a team of three to build a Bloch sphere simulator in Python for a Quantum Computing course. Developed GUI and command-line features for applying quantum gates, visualizing qubit state changes, and interacting with 1 to 3 qubit systems using NumPy and Matplotlib.

Table Reservation Management System

University Coursework Project | Programming 3 | Java

- Built a Java desktop application for table reservation management. Added features for creating, updating, canceling, and filtering reservations, checking availability, and saving/loading reservation data, while applying object-oriented programming and testing with JUnit 5.

Employee Data Management System

University Coursework Project | Programming 2 | C++

- Built an employee data management system in C++ for the Programming 2 course. Designed functionality to add, edit, search, and organize employee records, while applying core C++ concepts such as classes, file handling, and structured program design.

VOLUNTEER EXPERIENCE

IT Team Member

- Worked with the IT team to manage and maintain the TEDxBME website using Webflow. Collaborated with other teams to update content, ensure functionality, and keep the site aligned with event branding and timelines.

Feb 2025 – Present
Budapest, Hungary

Technical Support

- Provided end-to-end technical support for BME's Qiskit Fall Fest (IBM Quantum), ensuring smooth delivery of a two-day lecture + hackathon program through participant onboarding, troubleshooting, and presenter support.

Oct 2025
Budapest, Hungary

WORK EXPERIENCE

Lacasa Fashion

Warehouse Associate

- Managed incoming shipments and maintained inventory records for company goods.
- Assisted customers in industrial and corporate settings, working with both in-house and imported consumer products.

Aug 2022 – Aug 2023
Ramallah, Palestine
