📍 Budapest, Hungary

EDUCATION

Budapest University of Technology and Economics
B.Sc. Computer Science Engineering

Sep 2023 – Jan 2027
Budapest, Hungary

TECHNICAL SKILLS

- Programming: Java, Python, C, C++, SQL
- Web Development: HTML, CSS, JavaScript, Bootstrap, React, Vite, Webflow
- Tools & Platforms: Git, GitHub, Google APIs, VS Code
- Libraries & Frameworks: Java Swing, Tkinter, pandas, Pillow, NumPy, Matplotlib, JUnit 5, Pytest
- Other: Technical support, project coordination, teamwork, documentation

PROJECTS

Personal Portfolio Website

Personal Project | React, Vite, JavaScript, CSS

- Built and deployed a personal portfolio website to present my projects, experience, education, skills, and contact information, using project cards, live/code links, and clear sections to support internship and junior role applications.

GDG Certificate Generator

Community Technical Project | Python, Tkinter, pandas, Pillow, Google APIs, Pytest

- Led and built a desktop certificate automation tool for Google Developer Group on Campus BME, designing a workflow to generate personalized certificates from CSV data, preview outputs, export certificates as PDF/JPG files, and prepare email distribution while coordinating tasks, timelines, and team progress as project lead.

Pipes in the Desert

Group Coursework Project | Software Project Laboratory | Java, Java Swing

- Developed a Java Swing strategy game as part of a group project, where players control plumbers and saboteurs competing across a desert pipe network using movement, repairs, sabotage actions, water flow, rounds, and score tracking.

Todo List Web Application

University Coursework Project | Web and Mobile-based Software | HTML, JavaScript, Bootstrap

- Developed a responsive todo list web application using HTML, JavaScript, and Bootstrap. Implemented user registration and login, task creation and deletion, status-based filtering, item reordering, and localStorage-based persistence, with separate todo lists maintained for each user.

Bloch Sphere Simulator

Group Coursework Project | Quantum Computing | Python

- Worked in a team of three to build a Bloch sphere simulator in Python for a Quantum Computing course. Developed GUI and command-line features for applying quantum gates, visualizing qubit state changes, and interacting with 1 to 3 qubit systems using NumPy and Matplotlib.

Table Reservation Management System

University Coursework Project | Programming 3 | Java

- Built a Java desktop application for table reservation management. Added features for creating, updating, canceling, and filtering reservations, checking availability, and saving/loading reservation data, while applying object-oriented programming and testing with JUnit 5.

Employee Data Management System

University Coursework Project | Programming 2 | C++

- Built an employee data management system in C++ for the Programming 2 course. Designed functionality to add, edit, search, and organize employee records, while applying core C++ concepts such as classes, file handling, and structured program design.

RELEVANT EXPERIENCE

Google Developer Group on Campus BME

Technical Team Core Member

Jan 2026 – Present
Budapest, Hungary

- Contribute to internal technical projects for community events and serve as Project Lead for the Certificate Generator project, coordinating tasks, timelines, and team progress.

BME Qiskit Fall Fest

Technical Support

Oct 2025
Budapest, Hungary

- Provided technical support during a two-day IBM Quantum lecture and hackathon program, helping with participant onboarding, troubleshooting, and presenter support.

TEDxBME

IT Team Member

Feb 2025 – Jun 2025
Budapest, Hungary

- Helped manage and maintain the TEDxBME website using Webflow, updating content and supporting event-related digital operations with other teams.

WORK EXPERIENCE

Lacasa Fashion

Warehouse Associate

Aug 2022 – Aug 2023

- Supported inventory and logistical operations for multiple clothing stores, including incoming shipments, inventory records, restocking, and order fulfillment in a fast-paced retail environment.
